

# OraVet Chews clean and protect against plaque and tartar<sup>1</sup>

Advanced dual-cleaning action

## CLEAN

Chewing action helps scrub away the plaque

## PROTECT

OraVet Chews form a protective barrier against the bacteria that lead to plaque and tartar buildup

# A breath of fresh air in oral care for dogs

OraVet<sup>®</sup> Dental Hygiene Chews make it easy to clean teeth and protect against the bacteria that lead to plaque, tartar, and bad breath

Each daily OraVet Chew:

- Creates a preventive barrier, blocking bacteria that lead to plaque, tartar, and bad breath
- Removes plaque and calculus
- Contains the effective ingredient delmopinol
- Has a taste that dogs love<sup>1</sup>

## Get the most out of your dog's dental cleanings

Regular dental cleanings are an important part of good oral health for your dog. And effective daily dental care can help make those cleanings go more smoothly.

OraVet Chews have been shown to extend the benefits of veterinary dental cleanings by reducing plaque and tartar buildup and bad breath.<sup>2</sup> Ask your veterinarian about using OraVet Chews following your dog's next cleaning.

Purchase OraVet Chews from your veterinarian today!

Say goodbye to "doggie breath"

## The benefits of delmopinol

### The special ingredient in OraVet Dental Hygiene Chews

One of the ways in which **OraVet** Chews work is due to an ingredient called delmopinol. Used for years in a human oral rinse, delmopinol gives **OraVet** Chews their unique cleaning action.

Each chew contains delmopinol in the center well, which is released throughout the mouth as soon as your dog starts chewing. Delmopinol creates a barrier against the bacteria that lead to the formation of plaque, tartar, and bad breath.

That's all it takes to provide serious daily dental care to your dog!

### OraVet® Dental Hygiene Chews are clinically proven to reduce bad breath in dogs<sup>1</sup>

Some people may think it's normal for a dog's breath to stink. But bad breath is not normal. Without regular cleaning, plaque- and bad breath-causing bacteria build up on teeth and gums. If not removed, plaque hardens and turns into tartar and can lead to persistent bad breath.

With **OraVet** Chews, your veterinarian can provide you with an effective and convenient way to stop your dog's bad breath before it starts.

**OraVet** Chews are easy to give once daily because they have a taste dogs love.<sup>1</sup>

### See the science behind OraVet Chews

Go to [OraVet.com](http://OraVet.com) to see a video on how delmopinol creates a protective barrier that keeps your dog's mouth clean and fresh

## Dogs love OraVet Chews. You'll love the convenience.

### A simple, tasty way to provide at-home dental care

**OraVet** Chews have a taste dogs love. How do we know? Because in a clinical trial, most dogs studied took **OraVet** Chews the first time offered.<sup>1</sup> And in a separate study owners said they enjoyed giving **OraVet** Chews to their dogs.<sup>3</sup> Who knew cleaning your dog's teeth could be this easy!

### Available in 4 Low-Calorie Sizes

	Size	Dog Weight	Calories per Chew
	Extra Small	3.5 to 9 pounds	26.8
	Small	10 to 24 pounds	47.7
	Medium	25 to 50 pounds	80.5
	Large	Over 50 pounds	128.2

For dogs 6 months of age or older. Do not administer **OraVet** Chews to cats.
